I-CAR ANNOUNCES GOLD CLASS FOR DSI PANELS

I-CAR Australia Gold Class Coordinator Gary Wood today announced that DSI Panels in Victoria has been awarded the prestigious I-CAR Gold Class Collision status.

“David, Clarissa and Daniel approached us in January to develop a training plan that would see the business achieve I-CAR Gold Class status. DSI have been regular participants in I-CAR training in recent years so it was not a difficult process to outline the training requirements for them. They have achieved their goal within the timeframe we discussed through regular participation in Virtual Classroom training and the I-CAR Steel Welding Certification.”

The Gold Class accreditation demonstrates the exceptional standards set by DSI Panels and emphasises the commitment to their staff and customers alike,” said Mr Wood.

“We are so proud to receive our I-CAR Gold Class accreditation. DSI is committed to employee development and our team found the training well-structured and engaging. I-CAR has made it easy for us to continue improving our employee knowledge and skills to ensure we never compromise on customer service and safety.

We could not recommend I-CAR training highly enough and look forward to continuing to improve our knowledge of our great industry. Thanks so much to Gary, Jason and the team,” explained David Iacobucci.

I-CAR, founded in 1979, is an international, not-for-profit, training organization dedicated to improving the quality, safety and efficiency of auto collision repair for the ultimate benefit of the consumer.
